Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

To whom it concerns,

Please consider this request that LightSquared should not be allowed to go forward until it is shown that their plan will not interfere with high-precision GPS, not only the surveying & mapping industry will be harmed, but so will the hundreds of thousands of people who use the data surveyors & mappers produce.

I am requesting, as a user of high-precision GPS, you **oppose** LightSquared's request (which ignores the recent independent test results) to affirm its license and its request to go forward with its plan.

Sincerely,

James Owens
Florida Professional Surveyor & Mapper, LS5014
